

Radiall completes the acquisition of Diconex and DETI Microwave

Paris, France – March 17, 2026 – Radiall has completed the acquisition of Diconex and its subsidiary, DETI Microwave, from Groupe Laroche. This strategic transaction strengthens Radiall's Radio Frequency business by expanding its portfolio of high-power, high-frequency components and antenna solutions.

Strategic alignment strengthening technological capabilities

Diconex and its subsidiary DETI Microwave, renowned for their expertise in RF components and antenna solutions, enhance and expand Radiall's portfolio with cutting-edge technologies. Their capabilities further strengthen Radiall's offering in sovereign sectors in Europe (electronic warfare, tactical communications, SATCOM), while unlocking new growth opportunities in markets such as rail and advanced industrial applications (industrial drying, etc.).

This integration will enable Diconex to capitalize on Radiall's global footprint and broad market access, while leveraging the Group's R&D expertise to accelerate its development and growth.

"Joining Radiall opens a new chapter toward a Diconex 4.0. It enables us to access new markets, strengthen our R&D and industrial strategies, and better serve our customers thanks to a global network and Radiall's advanced expertise," said Christophe Pigault and Emmanuel Michaut, Managing Directors of Diconex.

Diconex will retain its identity and current management team. This decision ensures managerial continuity, supports the development of its own momentum and guarantees uninterrupted service for its existing customers.

A concrete implementation of Radiall's M&A* strategy

This acquisition supports Radiall's M&A strategy, which is aimed at diversifying its product and market offering with the objective of doubling its revenue.

"The quality of the teams and the strong technological fit with our RF product portfolio make Diconex a major strategic asset. We are proud to preserve this expertise in France and to strengthen our presence in demanding markets," said Pierre Gattaz, Chairman of Radiall.

"The strong expertise of our teams and strategic alignment of our RF product offerings position Diconex as a major strategic asset. We are proud to preserve this expertise in France and strengthen our footprint in demanding markets," said Pierre Gattaz, Chairman of Radiall.

"This divestment to Radiall enables the shareholders and management of Groupe Laroche to secure the long-term future of Diconex-DETI within a robust industrial framework combining strategy with the highest technical standards, ensuring excellence in continuity with the company's historical values," said Hervé Pouyet, CEO of Groupe Laroche.

*M&A: Mergers and acquisitions

About Radiall

Founded in 1952, Radiall is a global manufacturer of advanced interconnect solutions, employing over 3,500 people worldwide. The company offers a comprehensive range of RF connectors and cables, coaxial switches, fiber optic and microwave components, multi-contact connectors and more, supported by an international presence ensuring close customer support.

About Diconex

Based in Andilly (Val-d'Oise, France), Diconex specializes in RF components and antenna solutions for demanding environments. Recognized for its technical expertise and manufacturing quality, the company serves markets requiring high-performance and reliable solutions, and has built a strong reputation in the design, manufacturing and calibration of advanced RF systems.
